

## Alternatively Fueled Vehicles

**Safety of passengers and crew is our top priority at Interislander.**

We collect information on 'alternatively fueled' vehicles, including electric, hybrid, hydrogen and LPG/CNG, to understand how many of these vehicles are travelling with us and to ensure they are loaded in appropriate areas of our ferries.

**Hydrogen powered vehicles** will be carried in the open air to ensure there is no buildup of gases.

If you are bringing a **plug-in electric vehicle** onboard you will need to avoid using rapid charging for at least 2 hours before check in.

If your **electric vehicle** has been modified or damaged in a collision, we may not carry it.

Please note, there are no charging facilities on board. The nearest charging stations to our terminals are:

Picton: Z, 101 High Street, Picton

Wellington: Mevo, Queens Wharf, 59 Customhouse Quay, Wellington
